1. In view of the appeal brief filed on March 29, 2006, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hager et al (cols. 2-4) in view of McDonald (cols. 1-2) and "LMC International". Hager et al discloses extruding a chewing gum material from an extruder, batch forming chewing gum pieces and then pouring or injecting a center-fill fluid into the interior of the

Art Unit: 1761

gum pieces. It would have been obvious to coat the center-filled gum in Hager et al with a molten candy material and insert a stick therein since it is well known to coat bubble gum with such a candy coating and insert a stick therein in the preparation of candy suckers in order to provide the suckers with an attractive form and appearance and with a means to hold the suckers, as evidenced by McDonald. Further, it would have been obvious to form the suckers into the shape of a ball since it is old to prepare lollipops, each having the shape of a ball, as evidenced by "LMC International".

4. Applicant's arguments with respect to claims 18-21 submitted in the appeal brief have been considered but are moot in view of the new ground(s) of rejection.
